

EchoLens Video Analysis Report

General Information

Analyzed on: September 28, 2025 at 03:43 PM

Video Duration: 11.57 seconds

Analysis Results

Predicted Event: roadaccidents

Confidence: 98.00%

Event Summary: The surveillance video initially shows a bustling urban street with numerous pedestrians walking on sidewalks next to a multi-lane road with moving vehicles. A specific moment captures a black car driving closely past a pedestrian on the sidewalk's edge. The scene then dramatically shifts to a major incident where a large vehicle is seen tipping onto its side on the street, causing pedestrians on the sidewalk to react. The immediate aftermath reveals a person on the ground near the street, accompanied by a large splash or cloud of spray, indicating a significant road accident.
