General Information

Analyzed on: September 28, 2025 at 03:39 PM

Video Duration: 11.57 seconds

Analysis Results

Predicted Event: roadaccidents

Confidence: 95.00%

Event Summary: The surveillance video initially depicts a bustling urban street scene with numerous pedestrians walking on sidewalks and vehicles moving on the adjacent road, all captured with some motion blur. This normal activity is then abruptly interrupted by a significant road accident. The aftermath reveals a large vehicle overturned on the street and sidewalk, with a visible cloud of dust or debris. Numerous pedestrians are seen reacting to the immediate incident, and at least one person is lying on the ground, indicating injuries sustained from the collision.
