

EchoLens Video Analysis Report

General Information

Analyzed on: September 29, 2025 at 03:47 PM

Video Duration: 11.57 seconds

Analysis Results

Predicted Event: roadaccidents

Confidence: 98.00%

Event Summary: The surveillance video initially shows a typical, bustling city street with pedestrians walking on crowded sidewalks and cars in motion. This routine scene is then disrupted by a major incident where a large vehicle kicks up a significant spray or dust cloud, causing a person to fall to the ground. The event culminates with this large vehicle, possibly a bus, lying overturned on its side in the street, with smoke or dust billowing from it, as numerous pedestrians gather around the scene.
