

# EchoLens Video Analysis Report

## General Information

**Analyzed on:** September 29, 2025 at 04:16 PM

**Video Duration:** 11.57 seconds

## Analysis Results

**Predicted Event:** roadaccidents

**Confidence:** 98.00%

**Event Summary:** The surveillance video initially depicts a busy urban street scene with pedestrians walking on the sidewalk and various vehicles, including a rapidly passing blurred black car, driving on the road. This ordinary activity is violently interrupted by a severe road accident involving a large vehicle, which appears to be tipping or has just collided, generating a substantial cloud of smoke or debris. Pedestrians on the adjacent sidewalk react to the chaos, and in the immediate aftermath, a person is seen lying on the pavement near the road, with a large cloud of dust or spray rising, indicating a recent and impactful collision.
