Analysis Results

Predicted Event: roadaccidents

Confidence: 98.00%

Event Summary: The event at an intersection depicts a sequence starting with vehicles like a large truck, a red car, and a motorcycle navigating the area. This was followed by a collision between a white car and a motorcycle. The subsequent frames show the immediate aftermath of this accident, featuring the damaged white car with a shattered or cracked windshield, debris scattered across the road, and multiple individuals gathered around the scene where the motorcycle is also present.
