

EchoLens Video Analysis Report

General Information

Analyzed on: September 29, 2025 at 03:35 PM

Video Duration: 11.57 seconds

Analysis Results

Predicted Event: roadaccidents

Confidence: 97.00%

Event Summary: The surveillance video captures a progression from a typical bustling urban street scene with pedestrians and moving vehicles to a chaotic accident. Initially, the street shows routine activity, but this is disrupted by a speeding black car. Subsequently, a major incident occurs involving a large vehicle, possibly a bus, overturning on the road. The immediate aftermath reveals a person lying on the ground near the crashed vehicle amidst dust and debris, indicating a recent impact, while numerous pedestrians gather on the sidewalk to observe the dramatic scene.
