Analysis Results

Predicted Event: roadaccidents

Confidence: 99.00%

Event Summary: The event began at an intersection where a motorcycle was in dangerous proximity to a large truck making a right turn, with a red car also negotiating the intersection nearby. This close encounter ultimately led to a collision, specifically involving a white car and a motorcycle. The subsequent scenes show the immediate aftermath of this road accident, with the white car exhibiting significant front-end damage and a shattered windshield, a fallen motorcycle, and debris scattered across the road, while several individuals observe the scene.
