

# EchoLens Video Analysis Report

## General Information

Analyzed on: September 30, 2025 at 05:11 PM

Video Duration: 21.16 seconds

## Analysis Results

**Predicted Event:** roadaccidents

**Confidence:** 99.00%

**Event Summary:** The overall event depicts a series of perilous traffic interactions at an intersection culminating in a significant road accident. Initially, a large truck made a wide turn with a motorcycle precariously positioned, and a red car also approached a motorcycle carrying two people, creating potential collision hazards. This complex situation led to an actual collision between a white car and a motorcycle. The immediate aftermath shows the white car with a shattered windshield and crumpled hood, debris scattered across the road, and several individuals present near the damaged vehicles.
