Analysis Results

Predicted Event: roadaccidents

Confidence: 98.00%

Event Summary: The surveillance video frames document a traffic event at an intersection where a large truck, a motorcycle (at one point carrying two riders), and potentially a red car were navigating a turn, sometimes in close proximity. The sequence culminates in the immediate aftermath of a serious road accident, featuring a white car with a shattered windshield, a fallen or stopped motorcycle, and scattered debris. Several individuals are visible, some lying on the ground and others standing nearby, indicating injuries and the recent occurrence of a significant traffic incident.
